

John Tyler has worked in nature conservation for over thirty years, first with the Ecological Parks Trust creating urban nature reserves for children to experience wildlife at first hand and then as the Warden of the Sevenoaks Wildlife Reserve in Kent, 135 acres of wetland and woodland where he created and managed habitats and guided schools and adult groups around the reserve. He has a particular fondness for Glow-worms. As well as wildlife, his interests include photography, prehistory, carving and coracles.

Talks are fully illustrated with colour slides and typically last between 45 and 60 minutes, but I can adjust the timing to suit. More details of each talk are available on my website and I come complete with all the necessary projection equipment.

Fee: £60 plus 50p per mile.

Guided Walks: I also run Glow-worm Walks during the summer and am happy to organize Wildlife Walks for clubs, societies and school groups. For more details, or to book a walk, please visit my website or contact me.

Wildlife Talks

John Tyler

1. ***Life in a Nutshell***
Discovering the world of small things.
2. ***The Island of Crabs***
Life on a speck in the Indian Ocean.
3. ***In the Forests of Borneo***
The plants, animals and people of a disappearing rainforest.
4. ***Australia***
A journey to the heart of the world's largest island.
5. ***Volcanoes and Dragons***
Exploring the islands of Indonesia.
6. ***The Changing Wildlife of the Chilterns***
A hundred million years in an hour!
7. ***The Ridgeway***
The history, prehistory and natural history of one of Europe's oldest roads.
8. ***The Lost Forest of Bernwood***
The wildlife and workings of an ancient Royal Forest.
9. ***The Forgotten River***
The life of the River Thames, from source to mouth, the Stone Age to the present.
10. ***The Glow-worm***
The strange life of a magical but seldom seen creature.
11. ***The World of Insects***
The most successful animals on Earth?
12. ***The World of Fungi***
An introduction to a fascinating Kingdom.
13. ***The World of Plants***
How they live, what they do and why we need them.
14. ***Wetland Wildlife***
Life below the surface.
15. ***Woodland Wildlife***
The ever-changing life of an English wood.
16. ***Trees and People***
An ancient partnership.
17. ***Making Space for Wildlife***
Encouraging nature in your garden.
18. ***Animal Architecture***
Nature's builders and their homes.
19. ***Natural Signals***
How plants and animals communicate (and what they're saying).
20. ***The Seasons***
A year in the English countryside.
21. ***The Countryside in Spring***
The season when the countryside comes to life.
22. ***The Countryside in Summer***
Wildlife's busiest season.
23. ***The Countryside in Autumn***
The season of fungi, fruit and fog.
24. ***The Countryside in Winter***
The wildlife that thrives in even the most challenging conditions.
25. ***Reading the Countryside***
Learning more from a walk; what to look for and what it means.
